Languages: Russian (native), English (fluent), Japanese (N3, conversational).

## Summary

---

Full-stack software engineer with 12 years of web development expertise coupled with 3 years in engineering leadership roles.

Proficient in converting product goals into software solutions and leading technical teams. Passionate about continuous learning and professional development within the tech industry.

## Skills

---

**Languages:** Rust, Python, Go, Javascript/Typescript, Node.js, PHP, Java, Ruby

**Front-end:** React.js, Next.js, HTML5, CSS/Less/Sass, Tailwind css, UI/UX

**Back-end:** RDBMS, NoSQL, REST API, CLI applications, unit testing

**DevOps & tools:** Linux, Docker, AWS, CI/CD, Git, Github actions, Gitlab, Jira

**Other:** Engineering Management, Team Leadership, Computer Graphics

## Experience

---

**Shiawasedo Inc.** | [www.shiawasedo.co.jp](http://www.shiawasedo.co.jp) | Kobe, Japan

**Full-stack engineer, Engineering manager, 09/2013—Present**

- Full-stack engineer: responsible for backend, frontend, UI/UX, SRE, and DevOps.
- Engineering manager: hire, mentor, distribute tasks, write technical specifications, conduct code review.
- Writing design docs and reaching agreements with stakeholders. Translate the business ideas into reality through a technical tasks for the development team.

### Accomplishments:

- Launched several projects in logistics area from design to deploy (warehousing, shipping, managing customer orders).
- Increased sales in a main project by 100% by redesigning the entire website, product landings, and campaign pages.
- Developed an internal Wallet system to sustain and boost customer payments during a period of discontinued payment cards that helped a company to save its customers.
- Led the development of an internal API that consolidates delivery data from various carrier services into a single endpoint. This API is now integral to several of our projects, enabling swift decisions regarding optimal parcel shipping carriers.
- Designed and developed a user-friendly sales campaign application, allowing sales managers to effortlessly create campaigns without coding, that decreased a time of campaign preparation.
- Developed a sales statistics application that provides sales counts and stock reports for all warehouses, allowing managers to monitor sales and make timely decisions.
- Successfully recruited and built a team of engineers who continue to make significant contributions to our company.

---

**FreshDoc** | [www.freshdoc.ru](http://www.freshdoc.ru) | Ufa, Russia

Fullstack Software Engineer | 08/2011—09/2013

Freshdoc.ru is a leader in LegalTech innovations in Russia.

Developed components for a legal document builder SaaS with PHP, javascript, HTML, CSS.

---

**Bashneft** | [bashneft.ru](http://bashneft.ru) | Ufa, Russia

Software Engineer | 11/2008—08/2011

Developed, implemented, and supported of an integrated enterprise management system (SQL, Oracle DB), remotely supported the internal users.

---

**Ufa Motor-Building Production Association** | [www.umpo.ru](http://www.umpo.ru) | Ufa, Russia

Software Engineer | 07/2008—11/2008

Developed an integrated corporate system with Delphi 7.

---

**MDM group of companies** | [www.npfmdm.ru](http://www.npfmdm.ru) | Ufa, Russia

Solid Modelling Engineer, Web Engineer | 12/2005—07/2008

Designed and modeled 3D models of parts for printing machines in SolidWorks.

---

## Education

---

**Ufa State Aviation Technical University — Mechatronics engineer**

Master's degree, Ufa, Russia, 09/2003—07/2008

---

## Professional Development

---

**AWS Cloud Practitioner Essentials** (Amazon Skill builder, 2024)

**Certified Kubernetes Administrator** (Udemi, ongoing)

**Machine Learning Specialization** (Coursera Stanford University & Deeplearning.ai, ongoing)

**Data Science specialization** (Coursera, 2023)

**Machine Learning** (Coursera Stanford University online course, 2017)

**Introduction to Artificial Intelligence** (Coursera Stanford University online course, 2011)

**Writing queries using Microsoft SQL Server 2008** (Microsoft, 2009)

---

## Japan residence status

---

Engineer/Specialist of humanities/Int'l Services for 5 years, valid to 18/08/2024.

---

## Personal

---

Playing basketball, snowboarding, full marathon running, swimming.

Playing piano, drums.

Passionate about mathematical and logical problem solving, Leetcoding.

Computer graphics, digital art.
